BRIEF ABSTRACT OF LETTER.

Submits a rule on the Amalgamation of the Electrical
 the Military Workshops with the C. S. W. and requests early
 orders of Govt. on the proposals.

NOTES AND ORDERS.

1. Dewan's orders on the P. V. D.

"This should be brought into effect as
 early as possible."

2. The Dir. of St. and the Ch. Electric

Serial
No.

engineers estimate the savings to get from the amalgamation of the ~~C. S. W.~~ Electrical workshop with the E. S. W. at Rs 12,000/- p. A. The note raises the following points for orders:—

3 (1) The Electrical workshops at Sivasamudram & Illypore^x which are equipped to carry on urgent work may be continued as at present— this may be appd. (or R. 386-2.1)

4 (2) A sum of Rs 386/- per month has to be allotted to meet the wages of temporary labourers to be employed from time to time— This lumpsum grant is liable to abuse. The Finl. Secy. may perhaps be consulted as to the safeguards to be provided for the proper utilisation of the grant.

(3) A capital expenditure of Rs 4000 to Rs 5000 is necessary for the transport & reerection of the machinery at the E. S. W. — This is an inevitable charge if the amalgamation has to come into effect & this may be sanctioned with the observation that the expenditure on the item ^{should be} limited to the minimum possible.

6

9. (4) The administration of the amalgamated workshops may rest jointly with the Dis. of 2K and the Ch. Electrical Engineer for the present — The dual control proposed is not desirable from many points of view. One officer should be responsible ^{held} for the proper management of the workshop.

10 (5) The entire plant & the labour of the Military Workshop may be transferred to the amalgamated workshop — The Industrial Engineer's note on the subject said to have been enclosed to the P.U.D. has not been recd. — A draft calling for the same is subd. for app. The Dis. & the C.E.E. anticipate that half the cost of the est. of the mil. workshop can also be cut down after amalgamation. The Ch. Commandant's views on the subject may also be called for. It is not clear whether the cost of recreation & transport & recreation of machinery estimated at about 5000/- is inclusive of ~~that~~ ^{that relative} to the machinery at the mil. workshop.

11 (6) The repair work of all Govt. Depts. (except the Railway) should be

29 7/88) vide marginal remarks in
note: The proposals for amalgamation of the 3 Work-
Shops at Bangalore, which are calculated to result
in establishment savings of about Rs 12,000 p.a. immediate
and some thing more later, besides improvement
in the output of work in the C.D.W., may be approved.

30 The C.C.'s assent to the City workshops being
amalgamated with the C.D. Electrical workshops is
not on record. ^{Tho there is} ~~There is however~~ no immediate
saving in cost promised in the joint note in
the amalgamation of the City workshops. It is
stated that reduction of staff is about half
i.e. Rs 300 p.m. to Rs 150 p.m. is for fourth later.

31 The allotment asked for labour to Rs 38,678 p.m.
& the capital grant for re-erecting of plant to 4,00,000 Rs.
may be given. The disbanded staff may
as far as possible be provided for in this Misc.

35 I do not think the issue of orders on the general question which is that of amalgamation, need be deferred. The only point to be settled before issuing this order is to obtain the consent of the Chief Commandant to the fusion of his Workshop with the Central Industrial ~~Works~~ and Electrical Workshops. A communication may be addressed to him on this subject and he may be informed that Government desire this amalgamation in view of its obvious advantages and he may also be requested to offer any remarks he likes with a view to ensure that adequate attention will be paid to the works of his Department by the amalgamated Workshop.

36 I do not think it is necessary to discuss at length the question of working capital. It depends upon the volume of work undertaken each year and the amount of funds required for the yearly operations will have to be settled on annual budget estimates.

37 The disposal of existing stock is, no doubt a very important matter, but the amalgamation need not wait until the measures to be taken for its clearance ^{are settled}. The new Workshop will have to take over the stocks of all the present individual workshops and make the best effort to dispose of them promptly.

38 The order now to be issued may confine itself to the general points which should be settled for introducing the new arrangement of an amalgamated

from the Dis. of OK & the C.E.E.

D-400/27 of 3.3.28. —

Requests orders on the several points raised re—the future working of the amalgamated workshop & recommend the grant of duty allowance amounting to Rs 12/- p.m. to the Accounts Staff of the Electrical Dept. for looking after the audit of accounts of the workshop.

51 The following points have been specifically raised for orders in the joint note sent up by the Dis. of OK & the C.E.E. —

1. The amalgamated workshop —
The Govt. Central Workshop — ^{to} should be a separate unit under the charge of the Industrial Engineer & independent of either Dept.

52 2. The capital value of all ^{both} machinery and stock belonging to the ~~Depts.~~ Electrical & OK Depts. to be transferred to the Govt. Central Workshop under a separate head in the budget.

53 3. The Electrical & OK Depts. to be given credit for the value of the materials transferred to the Govt. Central Workshop.

54 4. The Govt. Central Workshop to be allowed ~~an amount~~ a working capital of Rs 3,00,000

68 2 - The question of a separate
Stores Budget for the Workshop. The
obvious trend of opinion in the
Report is that the Workshop finances
should be amalgamated (I would
call it merged) in those of
one of the first Depts concerned. It is
easy to see that the Elec. Dept is
what is meant ^{the} Dept indicated.

69 This raises an important question
of principle - namely, the very existence
of the Workshop as ~~an~~ a separate
institution. It is, I believe, necessary
that there should be a Workshop, with
an independent existence as workshop,
as distinguished from the ^{mere} mechanical
section or annexe of a Dept. Such an
independent workshop may serve
as a tentative substitute for a Poly-
technic, capable either of expansion
or ^{integral} absorption into a fully developed
Polytechnical Institute. If our
Workshop is financed by the Electrical
Dept, & controlled ^{solely} by the Electrical Dept
~~solely~~ (as it must be under the
present arrangement when there
is a change in the vicum-beney

NOTE—Contn. sheet.

of the Officer (Mr. D. J. P. C.), it is difficult
to see how it can have a distinct existence.
The object is to give the reasons
given - which merely reduce itself to this,
that with a separate stores account, and
on the assumption that
no profits are charged to Govt Depts, the
profits are likely to be small and
 provoke adverse comment, - do not
seem very convincing.

70. This is a point for orders. I am
personally of opinion that the Workshop
should have a financial provision of
its own. There is no reason why it should
not, ^{to furnish} an index of its efficiency, charge
reasonable profits on work done for other
Depts: etc.

3. Certain duty allowances are proposed.
(see para 6 of joint report). They
seem very reasonable, and amount
to Rs 1440 p. a., which is
but a small fraction of the
total saving of Rs 19560 effected
by the amalgamation. These allowances
may be so.

Amalgamated Government Central Workshop.

83. There are two questions for consideration and orders: firstly, detailed arrangements for the working of the amalgamated workshop and, secondly, organization of audit of its accounts.

84. As regards the future constitution and working of the amalgamated institution, the joint proposals of the Director of Industries and Commerce and the Chief Electrical Engineer are not clear in some respects. There are two alternative proposals placed before Government for consideration. The proposal to treat the amalgamated Central Workshop as a separate unit financed independently of any Government Department involves certain practical difficulties some of which are mentioned in the report itself. For instance, the stores belonging to the Bangalore Power and Lighting cannot easily be split up into (1) those which pass through the workshop and (2) those which do not pass through the workshop. The whole stores will have to form part of the new workshop organization. If the workshop is to be

85.

Yes.

M. K. S.

Serial
No.

86.
I don't see
No objection
K.R.

worked as a separate unit independently of the Electrical Department, there is no object in the stores to be directly used by the Bangalore Power & Lighting Section ^{being merged} ~~to be stored~~ in the amalgamated workshop. Orders have now separately issued sanctioning the formation of a Central Stores ^{in the Electrical Dept.} with ~~several~~ sectional stores as its Sub Stores and a Chief Store Officer has been appointed to be in direct charge of all the departmental stores with a view to improve the efficiency of the handling of stores and to reduce the existing stock to the minimum. How the inclusion of the B.P. & L. stores in the Central Workshop finance will affect the above arrangement requires to be examined.

87 It is said that a working capital of not less than Rs 3 lakhs will be required solely in consequence of the amalgamation. What return financially, this working capital will yield, the report does not discuss. According to the Balance Sheet for the period ending 31st December 1927, the Central Industrial Workshop has to account for a working capital of nearly Rs 2 lakhs. The transactions for the half year have resulted in a loss of about Rs 3,000/- It should ^{be} the aim of the amalgamated concern to work in such a way as not to be a burden on the general tax-payer. This aspect does not appear to have been examined by the proposers of the scheme.

General & Revenue Secretariat.

File No.

of 192

Serial
No.

that are likely to arise under this arrangement the joint authors of the report seem to favour the alternative scheme of amalgamating the Central Workshop finance with a Government Department. But this alternative proposal has not been sufficiently elaborated. It is not clear whether the Central Workshop should be attached to the Electrical Department or to the Industries & Commerce Department. From the proposals submitted regarding the audit of the accounts, it seems to me that the intention is to attach the amalgamated concern to the Electrical Department.

89 This leads me to the next question for consideration viz., organization of the system of audit. It is stated that the accounts of the amalgamated concern are being audited by the Financial Assistant to the Chief Electrical Engineer in accordance with the procedure in vogue in the Electrical Department. It is proposed to continue this arrangement and in view of the additional responsibility and work thrown on the Financial Assistant and his staff, the grant of certain Duty Allowances costing in the aggregate Rs 120/- per mensem is also recommended, especially *on the ground that the amalgamation in view of the fact that as a result of the has resulted in amalgamation there is* a saving in establishment charges of Rs 18,660/- per annum. It is added that a further sum of Rs 900/- per annum

Serial
No.

90.

I don't see how this affects the question. The arrangement ~~the~~ certainly results in a saving in the Workshop itself. I don't understand the position that no saving in an institution can be regarded as such unless there is also a reduction of staff in the Comptroller's office. H.T.

will also be saved, as charges of audit by the Comptroller's Office will hereafter cease. I am not sure that by the transfer of the audit work from the Comptroller's Office to the Financial Branch of the Chief Electrical Engineer's office, there will be any reduction of staff in the former office. If there is none, I fail to see how the amount of Rs 900/- will be available for incurring new expenditure. ~~So~~ far as the question of saving in establishment charges is concerned, the following facts have to be borne in mind in considering whether any portion of this saving will be available for new expenditure.

As a general measure of economy, certain retrenchments in the Transport Corps Workshop and the Military Stores were sanctioned in the Government Order of 16th May 1927 and notwithstanding this saving, there is an appreciable increase in the budget of the Military Department.

In the absence of details, I have not been able to verify the reductions anticipated from the amalgamation especially in respect of establishment. I find from the Financial Assistant's letter of 23rd April 1928 that the Stores staff would be more than doubled after the amalgamation. If the amalgamated concern is to be attached to the Electrical Department, the audit work should form part of the duties

Serial
No.

of the Financial Branch. The Financial Assistant is in receipt of a Duty Allowance of Rs 100/- and I do not see any justification for the grant of additional allowances either to that officer or to any member of his staff. If, according to the first alternative, the amalgamated workshop should be treated as an independent unit, the audit work should continue as heretofore to be conducted by the Comptroller through the Industrial Audit Section. For internal check there is, I believe, an adequate account staff already employed and if that is insufficient, proposals may be ^{called for} ~~submitted~~ separately in that behalf.

93. In the circumstances stated above, the whole question requires further consideration and I would suggest the appointment of a small committee consisting of the Director of ITC, the Chief Electrical Engineer and the Comptroller to the ITC as Secretary to go into the matter in detail ~~and submit~~ ^{and submit} recommendations.

DEWAN'S OFFICE.
Resolved on
28. JUL 1928
Reg. No. 643

95 There are a number of points to be settle
for giving ^{full} effect to the order of amalgamation of
the Central Industrial, Electrical and Military.
Workshops and on some of them divergent opinions
have been expressed as will be seen from the com-
munications and notes in the file. It does not
appear to me to be possible to arrive at a set-
tlement except by personal discussion. The
Electrical and Industrial Departments are pri-
marily concerned in this matter and it appears
to be advisable to discuss it at a meeting w at
which the following are present:-

The Director of Industries & Commerce
The Chief Electrical Engineer
The Development Secretary
The Financial Secretary
Third Member (Electrical Department)
and myself.

96 If the proposal is approved by the Dewan,
further action may be taken accordingly.

Settlement in connection with the
amalgamation.

103. The following points have to be
considered at the meeting proposed
to be convened for the purpose ~~in para~~ (vide
paras 95 to 98) —

1. Whether the Amalgamated Workshop
should be a separate unit financed
independently of any Govt Dept. or
whether it should be an ~~annex~~ ^{annexe} ~~annex~~
of any dept. — If the former, ^{with whom should} its
administrative control ~~should~~ rest — is
in a com. of Heads of depts. as suggested by the
Dir. of P.W.D. or is the joint. With the
C.E. & Dir. of P.W.D. jointly?

2. Is it neccy. to keep the Electrical
Stores separately from the other stores?

3. Should the Workshop charge profits on
works executed for Govt. depts.?

4. What is the Centage to be charged
on works executed for Govt. depts. to cover
"indirect charges". P.

5. The Finl. Secy. has raised the question
whether it is not desirable to abolish the
Electric Workshop at Illypore as a Separate
entity ^{its work being entrusted to} ~~of amalgamation with~~ the Railway
Workshop.

1- How are the opera-
tions of the Workshop
to be financed?

Serial
No.2207

109 The following communications relating to the Central Industrial Workshop are pending disposal:-

(1) Letter dated 4th April 1927 from the Director of Industries & Commerce and the Chief Electrical Engineer.

(2) Letter No. 2207/ 27-28 dated 18th February 1928 from the Director of Industries and Commerce.

(3) Letter No. 2207/ 27-28 dated 2nd March 1928 from the Director of Industries and Commerce.

(4) Letter No. 400/27-28 dated 3rd March 1928 from the Director of Industries & Commerce and the Chief Electrical Engineer.

(5) Letter No. 400/27-28 dated 22nd September 1928 from the Director of Industries and Commerce.

110. 2. Nos. (1), (4) and (5) relate to the working of the amalgamated workshop and the points raised in them may be brought under two broad heads, namely, (1) points of detail and (2) points of administration and organisation. On studying the file I find that it is necessary to get some further information in regard to the points coming under head No.(1) before dealing with them finally, and these points and the particulars required about them are noted in para 8 infra. The general policy of Government regarding the progress of the State in making and using mechanical appliances for all industrial and engineering purposes is involved in the consideration of points coming

Serial
No.

coming under head No. (2). This is a very important matter and I shall discuss it in a subsequent note.

/// 3. No. (2) refers to the write off of the depreciation in the value of the different kinds of assets of the Workshop. The amount recommended by the Director for write off in this letter was Rs ^{94,050-3-3}~~94,050-3-3~~ to end of December 1926. The Comptroller reported in his U.O. note dated 26th April 1928 that the amount actually adjusted according to audited accounts was Rs 93,437-3-3. The loss of the second half of the year 1926-27 was reported in the Director's letter to be Rs 3,846-15-10 and whether this has been adjusted has to be ascertained from the Comptroller and if it has been adjusted, there should be no bad legacy of the period ^{to end} of 1926-27 and whether ^{it} is so may be ascertained from the Director.

/// 4. In his letter of 18th February 1928 the Director reported that the total approximate value of stock not required amounted to -- Rs 24,233-7-10 and that the realisable value of this stock was estimated at Rs.9,597-9-5. He may be asked to state if the difference between these two figures is included in the depreciation of Rs 94,050-3-3. In the same letter the Director asked for permission to dispose of the unrequired stock. This permission does not appear to have been given and enquiry may be made if the articles are

The amt to be written off according to the Dir's letter is Rs 97,823-14-2 up to end of 27-28.
The Comptroller has written off Rs 98,645. The Comptroller has been asked to account for the diff.
D.F.N. has been put up to in regard to forming write off in the workshop. Bellamy's statement is Rs 97,823-14-2.

K.P.

(1)

Has been included.
The Dir may be permitted to dispose of this stock by auction.

K.P.

(2)

Serial
No.

are still awaiting disposal or have been auctioned.

113 5. Another point raised by the Director in this letter was the waiving of the rent for the workshop building due to the Public Works Department. I think this matter has been since considered and how it has been settled may be noted.

114 6. The loss referred to in para 3 is on account of the revaluation of the stock of finished products, raw materials and unfinished works in process and it has been provisionally adjusted. The amount involved is large and it has, therefore, I think, to be reported to His Highness. The working of the Workshop has not hitherto been satisfactory and it is necessary to adopt measures to improve its operations and to prevent or to minimise the loss on its working. I considered it therefore desirable to report the writing off of the loss along with proposals for placing the working of the Workshop on a more satisfactory basis. The final disposal of Communication No. (2) has, therefore, been pending for this reason.

115 7. The cost of training apprentices has hitherto been charged to the Operation Account of the Workshop. This is an arrangement which is unfair to the workshop if it is required to work strictly on commercial principles. The scheme of training, I think, requires

This question has been settled - rent being waived, the rent of the workshop building is being waived.

D F N put up

K P

Please refer to the statement

the loss on the workshop building is being written off. The circumstances are such that the loss is being written off.

21.12.1921

This question is being separately considered in consultation with the P.W.D. and may be dealt with separately.

NOTE - Contn. sheet

Serial
No.

Call for reference
from Govt. Secy

requires to be considered separately. What is the class of apprentices to be entertained for training in Workshop? Is it necessary to give them ~~any~~ scholarships? What is the wastage of materials caused by them? Is the training to be confined to persons drawn from the Artisan classes or are students of the Engineering College and the Mechanical Engineering School also to be given opportunities of ~~xx~~ learning practical work under the conditions of operation of a big Workshop? These and other connected questions have to be separately gone into before the scheme of training can be settled. The Director may, I think, be requested to send up a scheme worked out in all its details. From the point of view of the Workshop, however, one point has to be made clear and it is that the cost of training apprentices should be independently provided for as the Workshop cannot be expected to bear it if it is to stand the test of Commercial Concern.

116 8. The following are the points raised in the three communications, namely, (1), (4) and (5) relating to the working of the amalgamated Workshop and the action to be ~~xxx~~ taken or the enquiry to be made about them is indicated against them:-

Recommendations.Remarks.

(1) The Electrical workshops at Sivsamudram and at Mysore which are equipped to carry on urgent work may be

This may be approved as these Workshops are intended for works to be carried out locally at the two places.

NOTE--Contn. sheet

<u>Recommendations.</u>		<u>Remarks.</u>
be continued as at present.		<i>Suguna</i>
(2) (a) Reduction of the cost of the work establishment from Rs 2,200/- to Rs 1,600/- per month.		Whether the reductions referred to in (a), (b), (c) and (d) have been effected may be ascertained.
(b) Reduction of the cost of salaried establishment from Rs 1,640-9-0 to Rs 1,391-9-0 per month.		Details of the re-adjustment referred to in (e) may be required to be reported.
(c) Reduction in the cost of regular establishment of the Electrical Workshop from Rs 255-4-0 to Rs 92-12-0 per month.		The strength of a work establishment will depend upon the nature and volume of work requiring attention from time to time and it is therefore difficult to understand how it is proposed to be regulated by any definite fixed limit. If the work establishment referred to in the recommendation represents the minimum based upon previous experience the arrangement proposed may be approved. It is, however, necessary to know if this is so and if it is the intention to increase this establishment as occasions demand.
(d) Reduction in the cost of work establishment of the Electrical Workshop from Rs 775/- to Rs 400/- per month.		
(e) Allotment of a sum of Rs 386/- per month for readjustment stated to be necessary in the scale of wages and salaries.		
<i>Please see para 127 6730</i>		
(a) ~~From 2975~~		
(b) " 1895-13-08		
(3) Need for incurring a Capital expenditure of Rs 4,000/- to Rs 5,000/- for the transport of the machinery from the Electrical Workshops and its erection in the Central Industrial Workshop.		The machinery referred to has already been transferred ~~xxx~~ and the connected cost must have been already incurred. What it is may be ascertained and formal sanction conveyed
<i>Cost was Rs 12/5-15-0</i>		

<u>Recommendations.</u>	Serial No.	<u>Remarks.</u>
The opening balance of stock of the Combined Workshop for the year 1927-28 was estimated at Rs 84,800/- and it was stated that the stock had much depreciated in value and that a large portion of the liabilities would have to be written off.		conveyed for incurring^{it} if it is held under objection. The stock of the Central Industrial Workshop at end of 1926-27 was revalued and the deficiency written off. It is not, therefore, clear how there could be any deficiency in the opening balance of this Workshop for 1927-28 which is the same as the closing balance for the previous year. As for the stock of the Electrical Workshop it has to be taken at its proper value on the books of the amalgamated Workshop and the depreciation in its value up to the date of its transfer has to be borne by the Electrical Department. How this difference, if any, has been dealt with may be ascertained.
5) The need for a working advance for the amalgamated Workshop is urged and a separate reference on this subject~~is~~ promised.		Has this report been received? If not, the Director may be asked to send it up without delay.
5) Transfer of the entire plant and the labour of the Military workshop to the amalgamated Workshop.		This transfer has since been made and whether the present value of the plant has been added to the capital of the amalgamated

NOTE--Contn. sheet

Recommendations	Serial No.	Remarks.
The plant is valued at Rs 1700. Plant worth Rs 750 has been transferred to art workshop A grind stone worth Rs 20/- was sold, & taken to capital Plant worth 80 Rs is taken to CIW The rest - worth Rs 850/- is proposed to be disposed of as un-wanted stock Managerial copy UR		amalgamated Workshop may be ascertained. Proposals regarding the reductions feasible in the cost of establishment transferred from the Military Workshop to the amalgamated Workshop were ~~promised~~ promised, and it was stated that this cost could be reduced by at least one half. Whether this reduction has been effected may be ascertained.
(7) The amalgamated Workshop to be called "The Mysore Government Workshops".		The present name -- Central Industrial Workshop -- is not proper as the amalgamated Workshop carries out the works of not only the Department of Industries, but also those of other Departments including the Military and Electrical Departments. The name proposed is, I think, appropriate and it may be adopted. The question of the name to be given to the new Workshop may be settled finally when deciding the general Workshop policy.
	117	9. Please take very early action for obtaining the further information referred to above. This matter has been pending long and it is necessary to decide it soon. I shall note on questions of policy after the points of detail are verified and settled.

Subject:—.....

D-400/27-28
2
 d: 9-1-1930.

Forwarded with compliments.

119 I beg to submit below my remarks on the points raised in the minute of the First Member of Council dated the 8th October 1929.

120 Para 3:- The loss due to depreciation in the value of the assets of the Central Industrial Workshop as per final accounts is Rs 93,437-3-3. The loss incurred in working for the second half of 1928-27 was Rs 3,571-9-0. There was a loss of Rs 815-1-11 in the working of the concern in the succeeding year i.e., 27-28. The total loss is therefore Rs 97,823-14-2 as per accounts of the Workshop. All this loss appears to have been written off the Government accounts. The total amount actually written off in the Government accounts for the year 1928-27 and 1927-28 is Rs 98,161/= and Rs 484/= respectively. (Vide Page 24 of the Budget for 1928-29 and 1929-30). The Comptroller may perhaps be able to explain the small difference between the total loss as per the accounts of this Office and the amount actually written off by him in the Government accounts. There are no further losses for being written off. The Central Industrial Workshop worked at a profit during 1928-29 and I expect that it will work at a profit this year also.

121 The above loss although written off in the Government accounts has not yet been adjusted in the

Notes.

Case No. of 192....

38.

Subject:—.....

- 2 -

accounts of the Central Industrial Workshop as the formal sanction of Government for its removal from the Balance Sheet has not yet been received. This sanction may now be kindly conveyed.

✓²² Para 4:- The difference between the book value of stock not required and recommended to be sold, and its estimated realisable value is included in the depreciation of Rs 93,437-3-3. The permission to dispose this stock has not yet been accorded and all the articles, excepting those shown below sold on receipt of offers, are still in stock and may be sold in auction.

Name of article		Book Value			Value Realised		
Lathe	1	175	0	0	75	0	0
Tile Press	1	0	2,190	0	580	0	0
Pug Mill	1	0			275	0	0
Drilling Machine	1	0	250	0	75	0	0

✓²³ Early sanction for auctioning these articles may kindly be accorded.

✓²⁴ Para 5 - The amount due by the Central Industrial Workshop on account of rent was Rs 13,478-7-9, of which a sum of Rs 6,436/- was payable to the Public Works Department and the balance i.e., Rs 7,042-7-9 to the Comptroller to Government. The latter was written

X off

Notes.

Section:—

39

Subject:—

- 3 -

off in Government Order No: D.312-14/I&C.164-28-2 dated 10th July 1929. An additional grant was sanctioned in Government Order No: D.270-72/I&C.424-26-6 dated the 10th July 1928 to enable the Workshop to pay the amount due to the Public Works Department. This has since been done. This old rent account is now closed in the books of the Central Industrial Workshop.

25 Para 7 - The scheme for the training of apprentices has been separately submitted in this Office letter No: D2.2207/27-28 dated the 26th November 1929. The main object of the scheme is to train young men whose general educational qualification is not high and who may be expected after training to find employment as Mechanics in Workshops and general industrial concerns. For the purposes of the present note I would request that orders may be passed that the expenditure incurred in the training of apprentices need not in future be debited to the accounts of the Workshop proper and that a separate grant will be sanctioned if the scheme is approved.

3: 26 Para 8 - (1) - The Electrical Department have maintained the Workshops at Sivasamudram and Mysore. In view of the fact that the amalgamation has not been effected on the lines originally contemplated by the Chief Electrical Engineer, separate orders of Government on this matter are perhaps not necessary. This point has been fully dealt with by me in my letter

Notes.

Case No..... of 192....

Subject:—.....

- 4 -

Sl. 17 -- No: D₂-400/127-28 Dated the 22nd September 1928.
24

✓ (2) - a), b), c), d) & e) - in our joint letter dated the 4th April 1927, the Chief Electrical Engineer and myself estimated the total savings that might be realised by the amalgamation of the Electrical and the Central Industrial Workshops. The total monthly expenditure on account of the Salaried establishment as well as the Works Establishment of both the Workshops was at that time R^s 4,870-4-0. It was expected that as a result of the amalgamation, the total expenditure would be reduced to about R^s 3,870-4-0 effecting a monthly saving of R^s 1,000/=.

✓^d The expenditure on the salaried establishment in both the Workshops before the amalgamation was R^s 1,895-13-0 and the expenditure on works establishment was R^s 2,975/=. It was expected that as a result of the amalgamation, the expenditure on the salaried establishment would be reduced from R^s 1,895-13-0 to R^s 1,494-5-0 effecting a saving of about R^s 400/=. The expenditure on the Works Establishment was proposed to be reduced from R^s 2,975/= to R^s 2,386-8-0 effecting a saving of roughly about R^s 600/=. after allowing for certain increase in wages estimated at R^s 386/= to some qualified workmen to whom an increase in wages was long overdue. The expenditure at present on the salaried establishment is R^s 1,497-4-0.

X This

Notes.

Case No. 141 of 192....

Subject:—.....

- 5 -

This includes an increase of Rs 47-8-0 due to the rise in the salary of the Industrial Engineer which was not provided for at the time we submitted our joint proposals.

129 The expenditure on the works establishment at present is Rs 1,860-2-6 at the average rate of Rs 74-6-6 per working day. I may state that some small increase in wages to some old workmen has been given. As observed by the First Member in his minute, the expenditure on the Works Establishment will vary depending on the nature and magnitude of work in the Workshop. In my letter No:D2.1296/27-28 dated 12/15th April 1929, I have recommended that I may be permitted to incur an expenditure up to Rs 90/= per day on the normal works establishment in the Workshop. The present establishment will only be increased provided there is sufficient work. In order to provide that the normal establishment should not be revised as a matter of course when there is slight increase in work I propose to keep a small establishment not exceeding Rs 20/= per day for specified works. This will be disbanded when the works for which they are appointed are completed.

130 The total expenditure on the salaried and the works establishment of the combined Workshop is Rs 3,357-6-6 (Rs 1,497-4-0 plus Rs 1,860-2-6). As

X against

Notes.

Subject:—.....

- 6 -

against a saving of Rs 1,000/= expected by the Chief Electrical Engineer and myself as a result of the amalgamation the actual saving is Rs 1,513/-

(Rs 4,870-4-0 - 3,357-6-6) or Rs 18,156/= per annum.

I may state that this does not include the saving realised as a result of the abolition of the Military Workshops to which reference will be made later on.

13) The Electrical Department have however maintained a Stores Establishment purely for stores work. The total monthly cost of this establishment is understood to be about Rs 395/= per month. Its Works Establishment has been disbanded as the Central Industrial Workshop is making all the work required by the Department. The Central Industrial Workshop employ some of the workmen formerly employed in the Electrical Workshops to which reference will be made later on.

132 (3) The machinery belonging to the Electrical Workshops was transported to and erected at the Central Industrial Workshop at a total cost of Rs 1,219-15-0. This expenditure was met from the savings in the budget of the Department for the year 1927-28. The outlay has been added to the Capital assets of the Central Industrial Workshop. The machinery now in use in the Central Industrial Workshop requires further addition. This point need not now be considered here and a separate

X reference

Notes.

Subject:—

- 7 -

Not recd. yet.

reference will be made by me for the utilisation of the Capital Grant placed at the disposal of the Central Industrial Workshop for this purpose.

133 Revaluation of Stock - The revaluation in the assets referred to in the First Member's minute has already been dealt with in my note above. This revaluation was referred to in our joint letter as this matter had not been dealt with at the time. Separate proposals on this point were submitted to Government later on by me.

134 Working Advance - I shall submit a separate reference to Government in case the working advance at the disposal of the Workshop requires strengthening. In this connection, I beg to state that the Electrical Department has not paid the overhead charges on works executed by the Workshop for the Department. The total dues amount to over Rs 7,000/= at present. Government have approved that the overhead charges may be assessed at a rate equivalent to the charges on direct labour engaged on work and I request that formal orders of Government may be passed instructing the Chief Electrical Engineer to pay the bills of the Central Industrial Workshop on account of overhead charges.

135 Transfer of plant of the Military Workshops to the Amalgamated Workshop - The entire plant belonging to the Military Workshop was transferred

X to

It is E. E. has
been addressed
to the
for up.

Lx

Subject:—

Subject2

- 8 -

to the Central Industrial Workshop. The plant is valued by the Industrial Engineer at R^s 1,700/=. The figure R^s274-8-0 given in my letter No: D₂₇₋₂₈ 400 D/24-9-29 is not correct. A part of the plant valued at R^s750/= has been transferred for the use of the Art Workshop and is included in the value of the capital assets, of that Workshop. A Grinding Stone forming part of the assets of the Military Workshop was sold for R^s20/= as it was not required by the C.I. Workshop. The Industrial Engineer has been requested to remit the value of the grinding stone to the Treasury to Capital Sale Proceeds. The C.I. Workshop is using machinery belonging to the Military Workshop of about the value of R^s80/=. The value of this machinery will be added to the Capital assets of the C.I. Workshop in the Balance Sheet for the half year ending 31-12-1929. The balance of the machinery of the value of R^s 850/= is not required by the Central Industrial Workshop and may be auctioned. If approved this will be included among the items of finished stock and surplus machinery not required and disposed of in due course.

Wm. J. Dine

Works Establishment of the Military Workshop -

136 Before the transfer of the Military Workshop to the Central Industrial Workshop, Works Establishment costing R^s442/= per mensem was maintained by the Military Workshops. The entire work required by the Military Department is now being done in the Central

X Industrial

Notes.

Subject:—.....

- 9 -

Industrial Workshop which employs only two workmen (wages Rs 61-15-0 per mensem) formerly working in the Military Workshops.

137 The fixed assets of the Electrical Workshops -
The minute of the First Member does not specifically refer to this point. With a view however to make the note ~~xxxxx~~ complete, I beg to add that the total book value of the fixed assets of the Electrical Workshops transferred to the Central Industrial Workshop as finally assessed by the Industrial Engineer in consultation with the Superintendent, Bangalore Power and Lighting is Rs 18,559/- (Book value). The figure Rs 3,860/= given in my letter No: D₂-400/27-28 dated the 24th September 1928 is not correct as it does not include all the machinery transferred and was the approximate estimate of only the Industrial Engineer. The plant of the book value of Rs 9,512/= is not required for the use of the Central Industrial Workshop and may be disposed of as surplus machinery. The plant and tools of the book value of Rs 9,047/= are in use in the Central Industrial Workshop. The market value of this asset is Rs 7,490/=. This sum of Rs 7,490/= will be included in the capital assets of the Central Industrial Workshop in the balance sheet for the half year ending December 1929.

138 I may here give particulars of the establishment of the Electrical Workshops now working in the

Notes.

Case No. 146 of 192...

Subject:—

- 10 -

Central Industrial Workshops for attending to Electrical Work. This consists of 8 men drawing a total wages of Rs 312-8-0. This sum is of course included in the aggregate works establishment charges of the Central Industrial Workshop.

144

6/2/27

145 In his letter of 18th Dec 1928, the Dir of the requesting sanction to the write-off in the accounts of the C & Workshop certain sums, including the loss on working for ^{the period} half year of 26-27. In his u.o. note of 8-1-30, the Dir states that there was a loss of Rs 815-1-11 during 27-28, and that the total loss amount to end of 27-28 to be written off on per the workshop accounts is Rs 97823-14-2, and he requests sanction for the adjustment of the amount in the Bal. Sheet of the concern, as it has been advised in the Govt. a/c. The Comptroller has been asked to intimate what the difference in the figs on per Govt a/c & Workshop a/c is due to & what amounts have actually been advised. As recommended by the Dir now, the total loss to end of 1927-28 may perhaps be written off in the workshop a/c. D.F.N. already in the file, is submitted ^{for approval} suitably revised, to include losses till end of 27-28 as intimated by the Dir.

146 Regarding the sent due to the P.W.D., the Dir has since intimated in his u.o. note of 8-1-30 that the old amount due has been advised. No further orders ^{seem} necessary on this point.

Letter No. D. 9691 of 24-2-30

Serial
No.

Regarding the permission to dispose of the material not required, the Di has since intimated that only a few articles have been disposed of and requests sanction for the auctioning of the articles in question. Details of these articles have been furnished in the Statements A1 and B1 & sent by him. With this letter of 18th Feb'y 29, the Di may perhaps be permitted to dispose of these articles at values not less than the prices fixed in the Statements.

147 Regarding the training of apprentices at the workshop, the Di requests that for the present, orders may be passed that this expenditure need not be debited to the Workshop proper. As this question is separately under consideration (the scheme having been referred to the Bd of Govt for opinion) orders may perhaps be issued separately on the appor, ^{or action} ~~reply~~ on the above points may be taken now with reference to Di's reference of 15th Feb'y.

148 Able to make of no above, ^{notes on} the points, & necessary drafts will be put up in connection with the questions relating to the amalgamation of the workshops.

149 I regret the delay in submitting the papers as I ^{would} ~~had~~ intended to study in detail all the connected papers as I had not dealt with them before at any stage.

Yours truly

Secretary

Para. 111 Whether the loss on the workshop up to end of 1926-27 has been adjusted, should be ascertained from the Comptroller.

151.

The Comptroller has reported in his letter dated 17th March 1930 (Flag A.) that the loss on the working of the Central Industrial Workshop for 1926-27 has been adjusted in accounts and also that the total loss to the end of 27-28 aggregating Rs. 97,823-14-2 has been adjusted.

Para. 112. Whether the difference between the book value of the stock and its estimated realisable value has been included in the amount of depreciation to be written off.

152 The difference has been included in the amount of depreciation to be written off.

(Vide Director's remarks in para.122)

Whether the surplus stock has been ordered to be disposed of.

153 The Director has since been authorised to dispose of the surplus stock, machinery and other articles not required for use. Similarly the disposal of articles transferred from the Electrical and Military workshops and not required for use has been ordered to be sold. The surplus articles are being disposed of.

113. How the question of the rent due to the P.W.D. has been settled.

154 The amount due towards the old rent account was Rs. 13,478-7-9 of which Rs. 7042-7-9 was written off. An additional grant of Rs. 6,436/- was sanctioned to enable the workshop to pay the balance due to the P.W.D.

(Vide para. 124.)

115. The question of training apprentices in the workshop and of meeting its cost.

155 The Director of Industries and Commerce recently submitted a scheme for the training of apprentices in the workshop involving an initial expenditure of about Rs. 8000/- and a recurring

expenditure of a similar sum. He was informed that this could ~~be~~ not be sanctioned. The present system of training has, however, been ordered to be continued.

156 A Government order was issued directing that the expenditure on the training of apprentices should be debited to the Departmental budget and such expenditure adjusted every year against the savings in the budget of the Department of Industries and Commerce.

116 (1) Continuance of the Electrical Workshops at Mysore and Sivasamudram

157 A Government order sanctioning the continuance of the two workshops will, if ^{condoned} ~~approved~~ ^{has been} ~~approved~~, be put up. The Director states that no orders are necessary. (Please see para. 126).

158 Not necessary
Mull
10.5.31

(2) Whether the deductions proposed in the expenditure on salaries and establishment have been given effect to.

159 The Director reports that as against a saving of Rs. 1000/- p.m. originally expected from the amalgamation of the Electrical Workshop with the Central Industrial Workshop, the actual saving is Rs. 1513/- p.m.

(Please see paras. 127 to 131)

(3) Cost of transferring the machinery of the Electrical Workshop to the C.I.W.

160 The machinery has been transferred and installed at the Central Industrial Workshop at a cost of Rs. 1219-15-0 and the expenditure has been added to the capital assets of the Central Industrial Workshop.

(4) Revaluation of stock.

161 The loss on account of the revaluation of stock as at the close of 1926-27 has been included in the total loss on the working of the Central Industrial Workshop and has been adjusted in accounts and the write off of the total loss has now to be sanctioned.

162

10.8.31

52 ✓

Whether the depreciation, if any, in the value of the machinery transferred from the Electrical Workshop to the C.I.W. has to be borne by the Electrical Department.

164 The Dir may be asked to settle this in consultation with C & E. Mng. (10.8.31)

163 The machinery of the book value of Rs. 9047/- was added on to ^{the capital} assets of the Central Industrial Workshop at a valuation of Rs. 7490/-. The difference has to be borne by the Electrical Department. The remaining machinery not required for use has been ordered to be disposed of.

(Para. 137)

(5) Need for enhancing working capital of the C.I.W.

165 The Director has stated in para. 134 - "I shall submit a separate reference to Government in case the working advance requires strengthening".

(6) Whether the present value of the plant of the Military Workshop has been added to the amalgamated workshop.

166 The plant was valued at Rs. 1700/-. Plant of the value of Rs. 80/- was taken for use in the Central Industrial Workshop and the capital assets of the workshop was proposed to be enhanced by Rs. 80/-. The Director of Industries and Commerce has been permitted to dispose of the machinery transferred from the Military workshop and which was not required for use in the Central Industrial Workshop. (Para. 135).

How far the work establishment originally attached to the Military workshop has been reduced.

167 The expenditure on the work establishment of the Military Workshop was Rs. 442/-, except two workmen on Rs. 61-15-0, the rest of the establishment has been disbanded.

(Para. 136).

168 Orders are now required -

1. for writing off the accounts, the losses aggregating Rs. 97,823-14-2 incurred in the working of the concern up to the end of 1927-28.

169 The Draft Final Note already submitted on this subject in one of the linked files is for orders.

Amg. 10.8.31

170 2. for the continuance of the Electrical Workshops at Mysore and
Not necessary
My Sivassamudram..

(Director considers that no order is necessary)

171 3. for the write off of the difference between the book value and
the market value of the machinery transferred ~~to~~ from the
Electrical Workshop to the Central Industrial Workshop, the
depreciation being met by the Electrical Department. This
may be ordered.
